

1. General

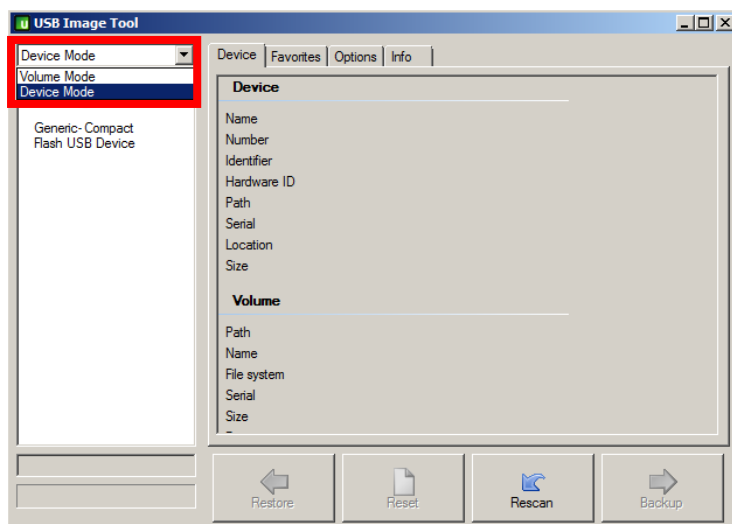

Please download the software tool, the image file and the instructions and unzip it completely. Follow the steps in Chapter 2 for restoration of your ComPanel CF card.

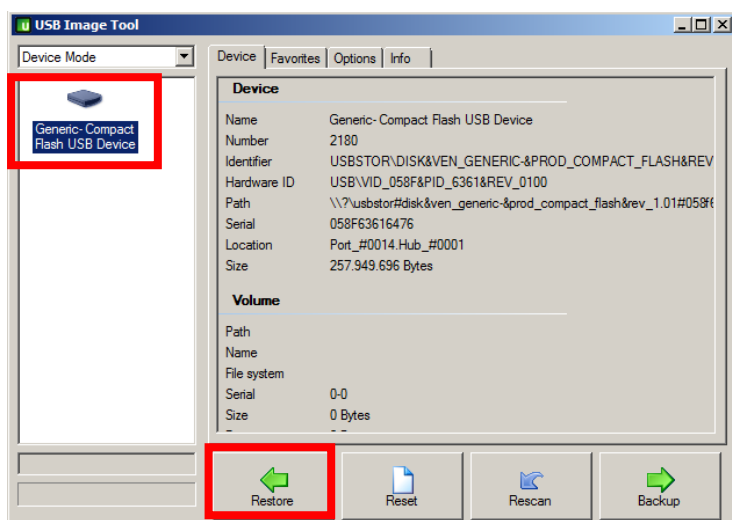

When restoring the CF card the card will be formatted, i.e. all data stored on it will be lost. It is therefore advisable to make a backup copy of the card before starting the recovery. After restoring, you can play the files back on the card, but beware: Do not copy the Diskern.bin back to the CF card!

2. Restoration of the CF card

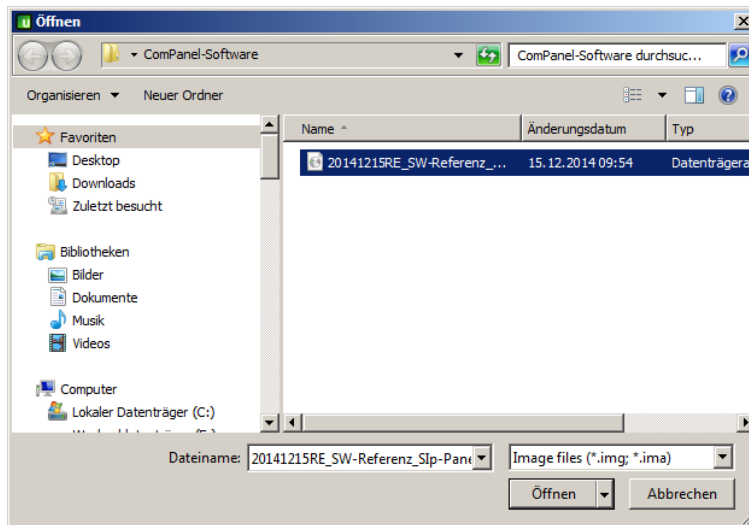

1. Open the folder „Disk Image Tool“ and start the exe-file „USB Image Tool“.
2. The tool window will open, choose the „Device Mode“.

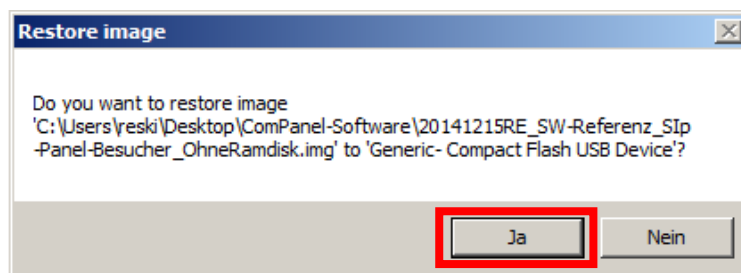

3. Select the drive with the CF card and click on the button „Restore“.

4. A new window will be open.
Select the downloaded image file and open it.

5. Finally, confirm the question of the restoration with "yes".

6. Your CF card is now restored.
